

EARTH DAY

Earth Day is an event organized every year on April 22nd to demonstrate support for environmental protection.

Today my class 5a, our teacher Ms Petrović Vidović and I cleaned our yard to show support and respect to our planet Earth. We collected paper and plastic in two separate rubbish bags and later threw the rubbish in their recycle bins.

It is important not to throw litter around, save energy as much as possible and take care of our beautiful planet because, at the end of the day, there is no planet B.

Earth Day Every Day!
